AXIOPRAX FIXES · D3 · INVENTORY & REORDERS

Low-stock alert checklist

Free Shopify setup: Flow email plus a weekly report

- ☐ **Turn on Track quantity for every product you want alerts for**
  Products > product > Inventory section > Track quantity
- ☐ **Install Shopify Flow (free)**
  Shopify App Store
- ☐ **Open the low-stock email template**
  Flow template: "Get notified by email when product variant inventory is low"
- ☐ **Set the same threshold in both quantity conditions**
  "Product variant inventory quantity" and "Product variant inventory quantity prior"
- ☐ **Add your team inbox to the email action**
  Send internal email > Email address (commas between addresses)
- ☐ **Turn on and test with one variant**
  Products > Inventory: lower a test quantity, then set it back
- ☐ **Check what runs out next, weekly**
  Analytics > Reports > Category: Inventory > Inventory remaining per product

Picking your threshold (our rule of thumb)

- Daily sales x supplier delivery days, plus a few days of buffer
- Not sure yet? Start at 5 and review after a month
- Products already below the line will not email until stock changes again
